

## Technical Services Representative – New Grad Position

**Intended Start Date:** May or June 2025  
**Employment Term:** Permanent, Full-time (40 hours / week)  
**Application Deadline:** February 5, 2025

### Position Description:

PureChem Services, the Canadian production chemical division of CES Energy Solutions, is looking for an energetic new graduate hire to join our organization in one of our major regional sales offices in Red Deer, Whitecourt, or Grande Prairie in Alberta or our regional office in Carlyle, Saskatchewan. The position will report directly to the local Area Manager.

Responsibilities include, but are not limited to, the following:

- Support local account managers in deploying solutions to customer challenges
- Product inventory and delivery management
- Field sampling of customer production for laboratory analysis
- Preparing monthly customer reports and interfacing with customers to discuss programs and account issues
- Provide technical services and support to existing customers with the assistance of the product line technical support groups

This position is an entry level training position. Successful candidates will find opportunities for career advancement including roles in either the sales or technical services side of the organization. Potential future opportunities within our technical services group include specialized opportunities in asset integrity/corrosion, flow assurance, or fluid separation. Sales career opportunities include account management positions that may be based in the field or at our head office in Calgary.

### Job Requirements:

#### *Fundamental Requirements*

- Ability to work in a multi-discipline team environment while also being able to operate autonomously/independently when required
- Attention to detail, strong organizational skills and respect for deadlines

## Technical Services Representative – New Grad Position

- Ability to travel up to 25% of the time
- Able to handle physical demands of field delivery of product in varied weather conditions
- Working familiarity with Microsoft Office applications including Microsoft Excel, Word, and Power-Point
- Familiarity with upstream and midstream oil and gas operations
- Full class 5 driver's license with a clean abstract is required
- Successful completion of an undergraduate degree in chemical or mechanical engineering

### *Preferred Requirements*

- Strong communications and presentation skills
- Working experience with Microsoft Power BI
- Experience with production chemistry and analysis procedures
- Direct experience with asset integrity for oil and gas operations

### **What We Provide**

- All operationally required training and certifications including WHMIS, TDG, H2S Alive, and First Aid.
- A long-term career development pathway for new recruits that includes a mix of on-the-job training, in-person classroom sessions, and asynchronous e-learning. Training includes both technical and non-technical subjects.
- Competitive salary and benefits package including regular health and dental with a healthcare spending account.

### **How to Apply:**

Please email your application package, including a cover letter, resume, and university transcripts to [hr@purechemservices.com](mailto:hr@purechemservices.com). Include Tech Services New Grad Application as the subject line of your email.
