

PureChem[™]
Services

OVERVIEW

CUSTOMIZED SOLUTIONS

OPTIMIZING OPERATIONS RESULTING IN OPERATIONAL SAVINGS

PureChem Services thrives on delivering customized chemical solutions to our valued customers. Our proven record of producing substantial savings to operators in our first ten years in the market has set the standard for service deliverables high, just where we like it. PureChem continues to develop new products to meet the ever changing challenges our customers face in their day to day operations.

MANUFACTURING, REACTING, AND BLENDING CAPABILITIES

PureChem Services manufactures and blends production chemicals, fracturing fluids as well as H₂S scavengers. Our in-house manufacturing facilities are in Carlyle, Saskatchewan, and in Nisku and Grande Prairie, Alberta, and our sister division, Jacam Catalyst also has multiple facilities south of the border. Our quality management systems at each of these facilities are ISO 9001:2015 certified. We have quality control laboratories at each our of manufacturing and blending plants to ensure superior products in every batch.

LABORATORY, ANALYTICAL, AND TECHNICAL SERVICES

PureChem's labs are continually developing new blends to resolve issues with a focus on asset integrity, flow assurance, and phase separation. Our full service labs are located in Calgary, Nisku, Drayton Valley, and Grande Prairie, Alberta, as well as in Carlyle, Saskatchewan. All of our local field offices are equipped to perform standard field-testing while more indepth testing is conducted at one of our full service labs.

IN-HOUSE TECHNOLOGY RESOURCES

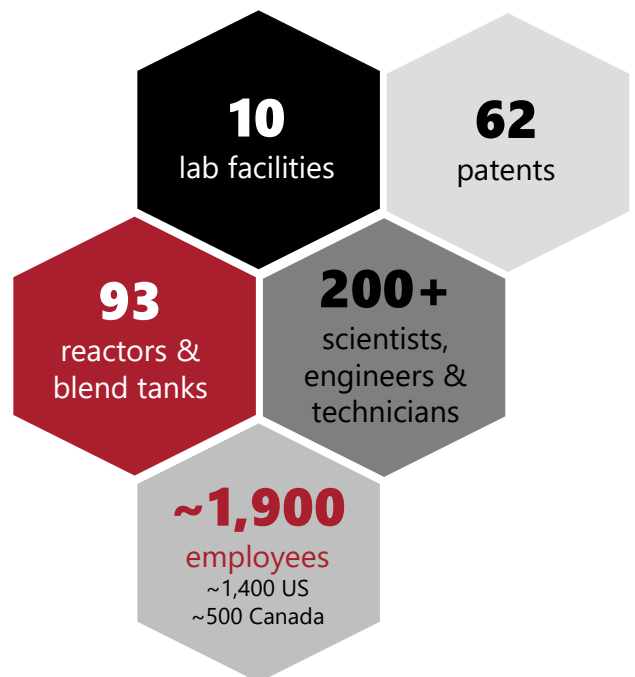

The PureChem technology team is focused on new product development in addition to supporting the current products and improvements; this is all conducted under the direction of our Chief Technology Officer.

SECURE SUPPLY CHAIN

CES Energy Solutions is PureChem's parent company. We have a dedicated team of people managing a diverse supply chain spanning multiple countries to minimize any risk to the import of our raw material. Our procurement group has supply agreements in place with minimum/maximum obligations for materials with most suppliers. Furthermore, our sister division, Jacam Catalyst operating in the US also has manufacturing facilities that help with mitigating any risk of supply disruption.

TRUCKING AND LOGISTICS

PureChem's trucking division has a broad variety of vehicles suited for oilfield hauling. The fleet is continuously and proactively growing to meet the needs of our customer base.

TECHNICAL EXPERTISE DESIGNING TAILORED SOLUTIONS

EXPANSIVE PRODUCT OFFERING

Production Chemicals

Corrosion Inhibitors
Scale Inhibitors
Demulsifiers
Paraffin Solvents/Dispersants
Water Treating
H₂S Scavengers
Amines
Asphaltene Dispersants
Antifoamers – Oil & Water Soluble

Production Enhancement

Acid Packages
Surfactants
Solvent Packages
Organic Acid Packages

Fracturing Additives

Water-based Gellants
Breakers
pH Control
Clay Control
Flow Enhancers
Biocides
Scale Inhibitors
Cross Linkers
Lubricants
Viscoelastic Surfactant Gel

HEALTH, SAFETY, AND ENVIRONMENT

The management of CES Energy Solutions is committed to providing a safe and healthy work environment that protects its customers, employees, the public, and the environment. We will continue to invest significant resources to ensure our products and processes meet the highest standards.

CORPORATE OVERVIEW

CES Energy Solutions is a leading provider of technically advanced consumable chemical solutions servicing the North American oil and gas industry. Since its initial public offering in March 2006, CES has grown through organic growth as well as through strategic acquisitions of companies who shared CES's approach to customer service. CES trades on the TSX under the symbol CEU and is quoted in the United States on the OTC under the symbol CESDF.

MANUFACTURING - Facilities in Carlyle, Nisku, Grande Prairie, and Kansas guarantee both the quality and supply of our products to the end user.

ANALYSIS AND R&D - Laboratories in Calgary, Carlyle, Nisku, Drayton Valley, and Grande Prairie enable us to provide rapid responses to customer needs and develop new products.

SERVICE - Our service technicians are well versed in the proper handling and application of our products. We can ensure the chemicals perform as they are meant to.

LOGISTICS - With a diverse fleet of delivery vehicles, we can control timely delivery of product to site.

VERTICAL INTEGRATION = SUPERIOR CUSTOMER SERVICE
