

TRUE SUCCESSES

STIMULATION ON WELL IMPROVED PDP RESERVES AND ACHIEVED ROI WITHIN A MONTH OF THE APPLICATION

Challenge

A major Canadian operator had a well that had been experiencing a steep decline and erratic oil production.

Solution

StimWrx/PureChem experts recommended a stimulation using their enhanced modified acid to remove scale deposition.

Benefit

The application using WRXSOL-ECO was successful in adding over 4m³ of oil production per day altering the decline curve from the past three plus years. This stimulation resulted in adding significant Proved Developed Producing (PDP) reserve value for the customer. The total job costs were under \$20,000 and return on investment on this job was less than one month.

Area

Willesden Green

Formation

Cardium

PureChem Product

WRXSOL-ECO
